Don't forget to ask for chilli BBQ sauce available

We prefer not to offer half & half pizza's as we feel it compromises the quality of the pizza. Please feel free to make your own combination or suggestions.

WOODFIRED PIZZA'S: ..they're kissed by the flame!! But seriously, we are cooking in a wood-fired pizza oven. Because of this there is usually slight charring on the cornicione (the outer rim of the crust). Any blackening on the bottom of the pizza is usually NOT burntness, just potassium rich (that means good for you!) wood ash, just make sure to wipe your lips before you leave

OTHER MAINS ON BLACKBOARD
